# Style, Comfort and Space

## Economical and Green

The Roomster is good for you and the environment

Style, Comfort & Space

Lewis Reed has exclusively produced this new small car alternative for the WAV market. It is not only economical, but is also good for the environment. It saves you costs whilst maintaining a responsive driving experience.

The Roomster has practicality at its very core, focusing on the general experience of the driver, passengers and scooter/wheelchair user.

Our specialist team have made intelligent design changes to this conversion, concentrating on making it quiet, smooth and extremely versatile. It has been built and finished to the highest standard with only you in mind, bringing a vehicle with exceptionally low running costs to the Lewis Reed range.

If you are seeking a vehicle which represents great value for money but does not compromise on quality, then the Roomster is for you.

## Style and Design

The new Roomster's appearance evokes a feeling of robustness, solidity and above all safety. Its sharp styling includes a striking wide radiator grille and fantastic 3D shaped headlights highlighting the stronger horizontal line of the car's front end. The sculpted bonnet, wraparound windscreen and optional full length sunroof gives this vehicle an air of style, elegance and contemporary design.

Stylish exterior

## Ergonomically designed dashboard

## Enhanced Comfort

The Roomster comes in both petrol and diesel options, manual and automatic transmissions and three different trims. The S, the SE and the Scout. This well equipped vehicle also offers an extra touch of luxury options, including central locking, electric windows, electric mirrors, air conditioning, panoramic sun roof, full leather trim and 13 different paint choices.

Internally, the front of the vehicle has been designed to cater for the needs of the driver with a clearly laid-out dashboard, ergonomically designed instruments and operating controls as well as comfortable seats, which can be adjusted exactly to suit you.

## Intelligent Space

Lewis Reed has designed the rear space of this vehicle for the needs of the passenger and wheelchair user. It offers its passengers a large, comfortable, airy, light and flexible space. The vehicle is fitted with an original full sized rear seat behind the passenger, this can be swapped for a narrower seat if extra space for the wheelchair user is needed. A 2nd full sized original rear seat can also be fitted. An easy to use quick release mechanism is available as an option to allow all the rear seats to be removed completely. The wheelchair position is as far forward as possible facilitating maximum inclusion for the user throughout the journey. Headroom for rear seat passengers is exceptional for a small vehicle and there are deep rear windows which offer a fantastic eye line for the rear passengers.

## Fantastic eyeline - Panoramic sun roof

## Environmentally Friendly

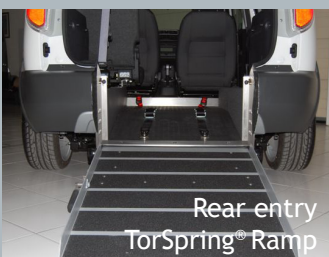

The new Skoda Roomster has been fitted with new technology designed to slash fuel consumption and reduce CO2 emission levels. It includes energy recuperation, start-stop technology and gear recommendation. It is available in both petrol and diesel. Both are amazingly economical, the 1.2 Petrol averages at 49mpg with only 134g/km emissions, where as the diesel model average at 60mpg with only 124g/km emissions.

Both are available on the Motability Scheme.

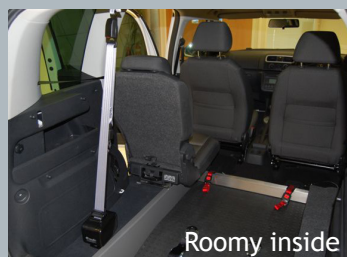

## Easy Access

The Roomster is a very accessible vehicle. The rear has Lewis Reed's uniquely designed integral TorSpring® Ramp mechanism makes entering a simple and easy task. It is light weight, durable and easy to use whilst still allowing the vehicle to retain its stylish good looks. As well as rear entry, this car has two wide side doors enabling convenient and easy access to its full size OE side seat, as well as assistance to the wheelchair user. Lewis Reed has designed a wide and flat useable wheelchair area ensuring maximum comfort and integration for the wheelchair user. It is suitable for securing both scooters and wheelchairs users.
